

Specification

DWSD-125R-WG-D28X40

Swivel single wheel with total lock, Solid stem

The main frame of the caster is made of steel, and the wheel core is made of polypropylene (PP) with strong bearing capacity.

TPR is used as the wheel surface material, which has excellent oil resistance, water resistance, drug resistance and mold resistance, and also has good shock absorption and noise reduction.

The outside of the wheel is made of ABS material, which is anti-corrosion and wear-resistant. The combination of the universal rotating ball disc and the balls has high load and strong bearing capacity.

Technical data

Wheel diameter	125mm
Caster width	76mm
Tread width	31mm
Solid stem diameter	28mm
Solid stem length	40mm
Offset	38mm
Swivel radius	125.5mm
Swivel interference	251mm
Overall height	150mm
Temperature	-30/+80°C
Standard	EN12531
Weight	1.1KG
Dynamic load capacity	100KG
Static load capacity	125KG
